

I understand there are businesses that want to change the do not call list in Indiana. I am on the list and strongly encourage it to stay as it is. I don't get the annoying and nuisance calls daily but still seem to have all of the information I need to live life and have what I need. I get mailings and hear commercials on television and the radio. The companies I do business with have enough ways to get in touch with me rather than annoy me with telephone calls. Don't change the system as it currently is.
